Report on Webinar

**Zoology Department organized webinar on 'Career in Zoology' on 02/06/2020 ( 2019-20) for B.Sc-III students.  
Resource person: Dr. I. K. Pai, Goa University Goa**

**During Covid- 19 Zoology Department organized webinar on 'Career in Zoology' on 02/06/2020 for B. Sc-III students.**

**Resource person: Dr. I. K. Pai, Goa University Goa.**

Conducted on: 02/06/2020 The Department of Zoology conducted a webinar The resource person – Prof. I.K. Pai , Professor, Department of Zoology, Goa University, Goa., spoke

on the topic. Prof Pai made the session very interesting by involving the science all the science students.

In his speech, Prof. Pai gave very important information regarding the opportunity and carrier in Zoology. Through the study of zoology, he said that students can gain an understanding of the natural world and how we can help them with conservation. The study of zoology focuses on all kinds of animals. Whether big or small, zoology looks into their biology, the how and why behind their environments as well as ways to sustain their lives alongside humankind.

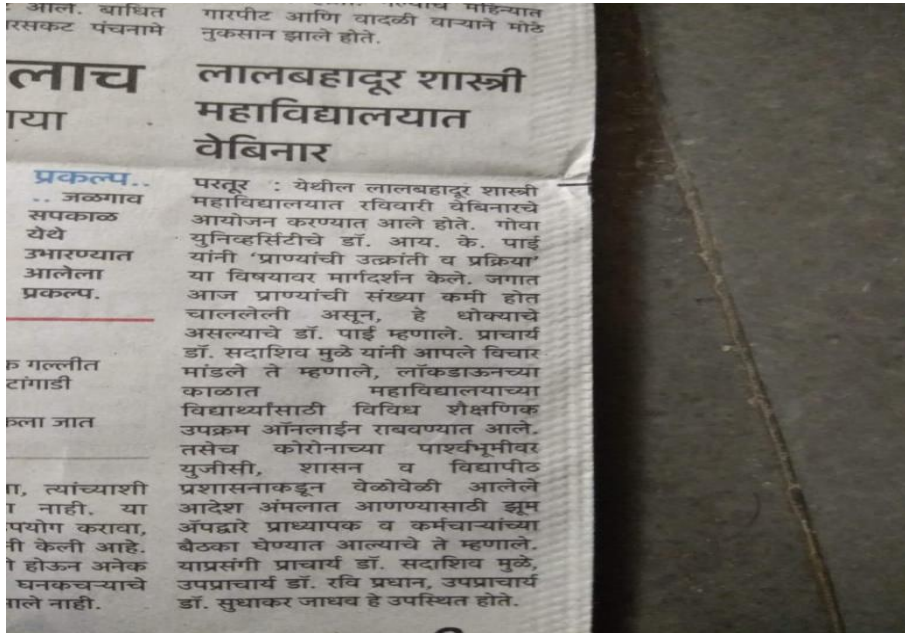

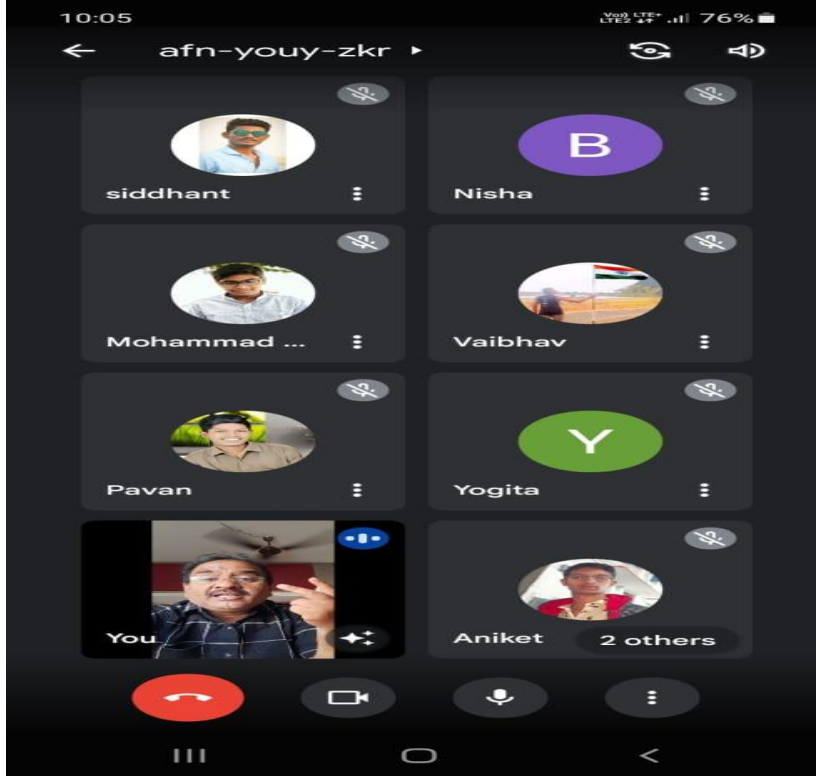

*he share a lot of modules with other courses, especially within zoology itself, but then you branch out into what you enjoy.”*

Zoology considers the impact of environmental factors upon different animals and their habitats, developing an appreciation of not only nature, but also of the importance of animals and their environments in sustaining nature as we know it. Through learning about animals at a micro level, we are better equipped to consider the wider picture. In doing so, it is possible to identify the threats - both manmade and natural, occurring in a variety of forms and challenge them.

Our Zoology degrees are deeply rooted in the real world and appreciate the complexity of its structures. Following a career in zoology can lead to careers as a zoologist, zookeeper, ecologist, or conservationist traditionally but, with a few specialisms, can allow access to jobs as reserve wardens and environmental consultancy.

Ultimately, Zoology can teach you how to make a difference. From essay writing, to labs and out into the field, this is a degree that matters. It also offers the opportunity to consider ways to face global challenges such as climate change and food security, trying to find solutions to help both animals and humans alike.

Lastly the vote of thanks given by Dr. Shelar S.D.

**(Online Guest Lecture)**

**Department of Zoology celebrate Science Day for all B.Sc. students on 28<sup>th</sup>  
Feb 2021**

**Speaker: Dr. Abhijit Kaystha**

**President of the Programme: Dr. B.D. Khandare**

**Organisation: Department of Zoology, Lal Bahadur Shastri Sr. College,  
Partur.**

National Science Day is celebrated on February 28 every year. As students, it is our responsibility to honor the great man and his invention, by contributing greatly to the field of science through innovation. Our department of Zoology arrange a webinarof Dr. Abhijit Kaystha.

In his speech he give the information and impotance of science. He also said that

National Science Day is celebrated to commemorate the famous Indian Physicist Sir C.V. Raman's discovery of the 'Raman Effect. 'Science Day is celebrated to keep people aware and spread a message about the importance of scientific theories and applications in everyday life.
